Investment Consideration Production and margin expansion

BUY

TINS' plans to expand and grow production through adding two new processing technologies, Fuming and Ausmelt are on progress. Fuming helps to process tin slag faster, and capacity of 85 tons per day will be completed by 1H18. An Ausmelt smelter, which can increase production by processing tin ore with a grade below 60% will have capacity of 45,000 tons a year and will be completed in 2020. In addition to smelter capacity expansion. TINS will increase mining production capacity through acquiring 2 new cutter suction dredgers and opening new 2 inland mining areas in Bangka and 1 in Belitung in 2017. In addition, TINS has signed a joint venture agreement with Topwide ventures in Nigeria which targets to produce volume of 6000 tons by 2019. TINS and Topwide Ventures Ltd will establish a 50:50 joint venture Newco. In terms of production for 2017-2018F, we maintain our estimates. We expect favorable tin prices as supply is still limited while demand is still high particularly demand for electronic goods from China. We also expect a margin increase from the shift in ratio of production from offshore QoQ vs the growth of production from onshore. We maintain our top line and bottom line targets, with bottom line targeted to grow by 55% CAGR in 2017-2018F.

Expecting higher sales from value added downstream

TINS plans to increase its downstream sales from tin chemical and tin solder to 10-30% from currently below 10%. As of 9M17, the contribution of Tin chemical and tin solder was 11.2% of sales with tin chemical revenue increasing significantly by 207% yoy. We believe the recent cooperation agreement with Yunnan Tin Group from China will help boost sales from tin chemical. In addition, TINS also plans to develop mineral products associated with tin (mineral ikutan/Logam tanah jarang) in the future.

Valuation: 33% upside

Based on DCF with WACC 7.9%. we maintain our target price for TINS within one year of IDR. 1200/ share or trading at 14.4PER, which gives 33% upside from current price (IDR.900/share). The share price has increased 16% so far in 2018. We recommend to BUY.

Company Profile

PT Timah (Persero) Tbk was established on August 2nd, 1976. It is a state – owned enterprise engaged in tin mining and has been listed on the Indonesian Stock Exchange since 1995. TINS' scope of activity includes mining, trading, transportations and services. The company's main activity is as a holding company that performs tin mining, operations, and marketing services for the group. Based on Business pillars, TINS has four business pillars including Tin mining, non tin mining, downstream Tin products and other businesses. The company has several subsidiaries either directly or indirectly engaged in the mining, industry, trading, transportation and services related to the mining business, as well as businesses in the construction sector, property, hospital services and agro-industrial enterprises. The company has diversified its business into non tin mining to maintain the performances of the company during tin business fluctuations. The company is domiciled in Pangkalpinang, Bangka Belitung Province. As of 2016, the company owned 128 IUP mining licenses with a total areas of 473,303 Ha. Tin exploration activity has been conducted for more than 50 years and is now being expanded to increase resources. Around 95% of the company's sales come from export sales while the rest are from domestic sales. For smelting, the Company operates 6 furnaces located in Kundur, Kepri and Mentok, Bangka. To Support Production, As of 31 December 2016, the Company owned 6 dredgers, 18 cutter suction dredgers and 3 stripping dredgers.

Company Structure As of 9M17

Source: company

SoE Holding:

The government's 65% ownership of shares in mining companies TINS (PT Timah Tbk), ANTM (PT Aneka Tambang Tbk), and PTBA (PT Tambang batubara Bukit Asam Tbk) are being transferred to Inalum, which is 100% owned by the Government. The government will still own the series A golden shares in these three companies., therefore there is no need for a tender offer. As they will be no longer majority owned by the government, the three issuers will not be called State Owned enterprise companies but subsidiaries of SOE, Inalum. The government still has control over this three issuers indirectly from previous directly. The purpose of establishment of this holding company includes to increase the capacity of funding for expansion, cost efficiency, for greater potential controlled and to better manage the mining reserve and resources. In addition, this holding will improve the value of downstream products for each company through synergy. For PT Timah itself, the development of the smelter for processing Tin ore to Tin Ingot to Tin products targets to increase value added by 10 times. Inalum will be an investment holder and not operational so each company will run their own operations.

SoE Holding structure

Tin regulation in Indonesia

The Minister of Trade has issued an amendment No. 33/M-DAG/PER/5/2015 to regulation No.44/M-DAG/PER/7/2014 on Tin Exports. This new policy is an evidence of the Government's seriousness in handling illegal tin mining as well as protecting tin reserves in the country. Referring to the Minister of Trade regulation No. 33 Year 2015, several tin export rules are tightened including the requirement to have a Clear and Clean (CnC) Certificate in order to export and the requirement to sell through the Indonesian Commodity and Derivatives Exchange (ICDX). As for the non-bar tin export products, solder tin, and non solder tin, the company can export without passing through the futures exchange. In addition, in August 2017, the Bangka Belitung Governor announced a moratorium on tin mining licenses to ease the sector's environmental impact. During the moratorium, the government will not issue new mining licenses or extend existing licenses. This regulation is expected to curb illegal mining and illegal exports of tin ore. The Bangka Belitung government is currently drafting a new mining regulation related to eco friendly tin mining methods.
